

SOURCE CONSTRUCTION

Reusable evidence from historical versions

Historical repair

Issue, patch, code
Versions V- and V+

Build witness

Requirement $r + W(I, A, O)$
Input / action / observer

Source executions

Same input and observer
Before / after behavior

Frozen source graph

Requirements, witnesses
Input / operation edges

same source identities; complete witnesses and relations

CURRENT REPAIR

Public task

Issue + inspected code
Current operation

Select and read

FAISS top-3 source IDs
Graph joins full records

Compose conditions

Bind source input roles
to the current operation

Execute and refine

Execute supplied checks
Observe, edit, repeat

Submitted patch → official verifier + common Joint / Preserve / Combined checks
